#Item Description

## TOILET FILL VALVES

**61580 Toilet fill valve 400AC**  
Pack: 1  
Adjustable, built in anti-siphon  
Adjustable water level  
Built in floater

**61594 Replacement seal 242C**  
Pack: 1  
For fill valve 400A

**61583 Toilet fill valve 400LSC**  
Pack: 1  
With Leak Sentry; prevents the  
automatic filling of a toilet if  
there is a leak

**61582 Fill valve and flapper kit 400CC**  
Pack: 1  
Contains; Fill valve 400AC &  
Dura-Flush 501 flapper

## FLUSH LEVERS

**61590 Flush lever 680C**  
Pack: 1  
White  
Can be bent and trimmed  
Fits most makes of toilets

**61591 Flush lever 681C**  
Pack: 1  
Chrome  
Can be bent and trimmed  
Fits most makes of toilets

**61592 Perfect Fit™ flush lever 640CP**  
Pack: 1  
White  
No cutting or trimming  
required, universal format that  
adapts to most makes of toilets

**61593 Perfect Fit™ flush lever 641CP**  
Pack: 1  
Chrome  
No cutting or trimming  
required, universal format that  
adapts to most makes of toilets

#Item Description

## FLUSH VALVES

**61595 Dual flush buttons 800P-001 - Chrome**  
Pack: 1  
Fits 2 piece dual flush toilets

**61588 Dual flush toilet kit 550DFRC**  
Pack: 1  
Converts most flush valve toilets  
to a dual flush

**61587 2" Flush valve 507AC**  
Pack: 1  
Includes Dura-Flush flapper  
Fits most makes of toilets

## FLUSH VALVE REPLACEMENT SEALS

**61596 Replacement seals PROSAELP15 - 3/PK - Blue**  
Pack: 1  
For American Standard  
Champion 4 & Eljer Titan

**61597 Replacement seals PROS3KP15 - 3/PK - Yellow**  
Pack: 1  
For American Standard  
Champion 3 & Kohler  
Aquapiston

**61598 Replacement seals PROS3MAP15 - 3/PK - Red**  
Pack: 1  
For Mansfield #210 & #211

## FLAPPERS

**61585 DURA-FLUSH 2" flapper 501C**  
Pack: 1  
Resists chlorine  
Fits most makes of toilets

**61586 Universal 2" flapper 500C**  
Pack: 1  
Fits most makes of toilets

**61589 Universal 3" flapper 5403C**  
Pack: 1  
Resists chlorine & will fit most  
makes of 3" toilets  
Allows to adjust liters per flush

## PUSH-FIT FITTINGS

### Q What is a Push-Fit Fitting?

A An easy quick connect system to join copper, CPVC or PEX pipe in any combination with *no soldering, clamps or glue, even when water is present.*

Tee

Coupling

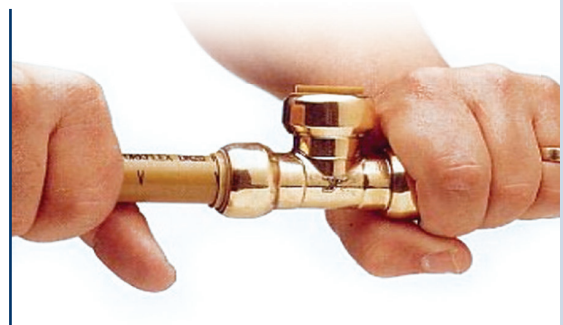

90° Elbow

### Q How does it work?

A Simply push to fit - no tools required.

When the pipe is inserted, the teeth in the Push-Fit fitting (or valve) bite down and grip tight while the o-ring inside the fitting creates a dependable seal.

### Q How does it disconnect?

A Using the uncoupling tool (Fig. A), disconnecting is fast; allowing fittings & valves to be quickly removed and reused.

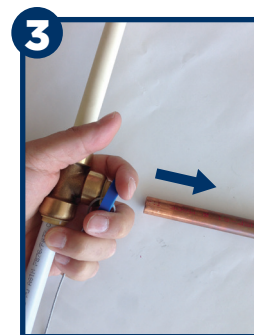

The uncoupling tool is used to open the teeth in the Push-Fit fitting (or valve) to release the pipe.

1 Snap uncoupling tool onto pipe.

2 Press uncoupling tool down with both fingers.

3 Pull out pipe.

## PUSH-FIT FITTINGS

### Q What are the sleeves inside the fittings for?

A To prevent potential leaks from bending with PEX pipe. *Sleeves should be removed when working with copper or CPVC pipe.*

### Q Are special tools required to install?

A No special tools are required other than a pipe cutter and sand-cloth to remove rough edges from pipe.

Pipe cutter

Sand-cloth

### Q What is a Push-Fit Fitting made of?

A Lead Free brass to meet CSA Standards.

### Q Is Push-Fit available in different sizes?

A Yes. Most common sizes for residential application are 1/2" and 3/4".

### Q What Push-Fit products are available?

A Valves, water supply lines, tees, 90° elbows, male & female adapters, couplings and caps.

Valves

Water Supply Lines

Tees

90° Elbows

Male Adapters

Female Adapters

Couplings

Caps

## PLASTIC PIPE CEMENTS & PRIMERS

### Q Can any cement be used with PVC or CPVC materials?

A Different cements have been formulated for various applications and materials. You should always use PVC cements with PVC materials and CPVC cement with CPVC materials.

### Q Can PVC cement be used with electrical PVC conduit?

A Yes, as long the application instructions are followed.

### Q Can PVC cement be used to join ABS to PVC?

A No. Green transition cement is solely used for this application.

### Q Should pipe be cleaned before priming?

A Yes. Cleaning is a necessary step.

### Q Why should primer be used?

A Primer softens the material (PVC or CPVC) and helps the cementing process. Coloured primer enables visible identification for inspectors.

### Q Can primer be used on ABS?

A No. You should *never* use primer on ABS pipe, as it will affect the integrity of the pipe.

### Q Are cements safe to use on water lines that carry drinking (potable) water?

A Yes. NSF approved PVC and CPVC cements should be used.

### Q What is the shelf life of cements and primers?

A PVC and ABS Cements, Primers and Cleaners have a 3-year shelf life, whereas CPVC cement has a 2-year shelf life from date of manufacture.

### Q Where can the date code be found?

A The date codes are located on the bottom of the can.
